THE REDCLIFF REVIEW THURSDAY, OCT. 15th, 1931

Number 3

## Three Entries For The Dramatic Contest

Red Cross Society Decides To Enter November Competition

Arrangements are now practically completed for the first dramatic contest which is to be held in the Cameo theatre early next month. There are three entries: St. Ambrose Anglican Church, Gordon Memorial United Church and the Red Cross Society. The play for the latter organization will be presented by the high school students. All proceeds, therefore, will stay right in Redcliff to help finance the churches and the Red Cross Society which will have heavy demands on its generosity this winter.

The winners will receive 10% more of the proceeds than the other contestants. Present indications are that the program will last well over two hours and that the three plays will be of quite a different type. Citizens should set aside the date of this entertainment as something to look forward to as it promises to surpass anything ever before attempted in this community.

The play selected by St. Ambrose Church Dramatic Society is "The Mock Bagger," a sentimental comedy written by Sheila Kaye-Smith and John Hampden. The Red Cross Society entry will be a tragic episode from Dickens' famous novel, "Oliver Twist," adapted for the stage by W. King.

Gordon Memorial Church will present a fine sentimental comedy entitled "In Honor Bound," by E. Grundy.

## SUFFIELD GIRL KILLED IN AUTO ACCIDENT

In an auto accident just west of Bowell Wednesday evening, Miss Voorthuyzen, a sixteen year old girl of Suffield, was almost instantly killed.

Deceased was driving the car herself and had three others with her at the time, none of whom were seriously hurt. It is said the car skidded into a deep ditch at the side of the road and turned over, pinning the unfortunate girl down.

Deceased at one time lived in and near Redcliff with her parents who were known as Four-thousands.

## A SPLENDID SPIRIT

Some time ago farmers of the northern part of the province volunteered to donate mixed vegetables for distribution among farmers of the drought areas. This offer has been accepted in several districts and the two railway companies have offered to carry the goods free of charge to their destination.

The spirit of the northern farmers is to be highly commended and it would be a good thing for this country and the world at large if there were more of this spirit practised during the present depression.

The Review understands that arrangements are under way to have a new kind of these donated vegetables taken into the drought districts. In addition among farmers in localities where crops and garden stuffs were a failure this year.

RUBBER

## Pottery Agreement Signed by Town

At Quiet Session of Council on Tuesday Evening

At the council meeting last Tuesday evening the agreement entered into between the town and the Alberta Pottery Co., was endorsed and the Mayor and secretary were authorized to sign same for the town.

This is the company which has taken over the old truck factory building and already has the machinery installed.

Permission was also given the Diamond D football girls to use the old Red hall on Third St. for a gymnasium.

As the Mayor and several of the councillors were absent very little other business was transacted at the meeting.

Mr. A. McKenzie, formerly manager of the bank here is making quite a name for himself as a golf player at Papet. His team won the cup which is emblematic of the championship of the district.

## Here and There

Montreal with \$94,000, Toronto with \$27,552, Winnipeg with \$17,587, and Vancouver with \$16,557, show as the four largest cities of the Dominion on the Federal Government census returns for 1931.

Seaboard ranks second to Ontario as an egg-producing province last year of thirty million dozen eggs. Total value of poultry products to Canadian farmers in 1930 was \$26,000,000.

United States motor traffic to New Brunswick for the current season up to July 21 was 12 per cent less than for the corresponding period of last year, according to a tabulation last issued by the Provincial Government Bureau of Information and Tourist Travel.

What is regarded as probably the highest park in the world is the National Park on Mount Robson, in the Canadian Rockies, on the main line of the Canadian Pacific trans-continental system. It covers an area of 100 square miles and is above the clouds. There is a new motor road to the summit of the mountain.

Bravallene Memorial Park, New Scotia, with its chapel and museum dedicated to the memory of the heroics of Louisbourg, the poem and the Acadian pioneers, has been visited by more than 34,000 tourists since it was opened in 1914. It is named from Donat Atlantic Railway headquarters.

Steady development of young Canada's interest in farming has increased to the point where a Canadian Council on Boys' and Girls Club Work has been formed to co-ordinate the Junior agricultural movement as a whole. The programme has been practically to include practically every line and department of modern farming in Canada.

Harassed officials of the Canadian Pacific Express Company at Vancouver played nurse recently to a sick man and his family. It was "Panny," a sad-eyed beauty, who carried by the company from Nelson, B.C., because the train was full of sick. Her calls were put through for the consoling, a Vancouver youth, who was overjoyed to find the unexpected parcel.

When Dr. Josef Wielawski, surgeon of the St. Pol, suffered an attack of appendicitis, his life saved by the intervention of Dr. A. B. Taylor of the Canadian Pacific. The Duke of Richmond, who attended him after a bout had been lowered and the stricken abdomen taken on board the Duke. The incident occurred recently when the Duke of Richmond was 200 miles off the coast of Ireland.

With a banned rifle and a roaring grizzly, a few yards distant, Dr. A. B. Klager, of Portland, Oregon, shot at the last Spring Lake, on a hunting excursion, at the last of the season of the Canadian Rockies, had a narrow escape. The huge animal delayed its attack long enough for the doctor to clear his rifle and shoot it. It lay on the hunt was two grizzlies, four black bears, three goats and two elk. (71)

## Former Redcliff Girl Weds at Vancouver

Irvine-Wright

A quiet wedding was solemnized on Sept. 23rd at the home of the bride's parents, in Vancouver, when Violet Minnie, eldest daughter of Mr. and Mrs. Fred Wright, formerly of Redcliff, became the bride of Mr. Richard Irvine, also of Vancouver. Rev. Matheson, formerly of Redcliff, officiated at the ceremony.

The bride was given in marriage by her father. She was attired in becoming beige. George, carried a bouquet of phloxias and lilies of the valley. The bride was attended by her sister, Marjorie, who was gowned in blue georgette and carried asters. The groom was supported by Mr. R. Reeve.

During the signing of the register Mrs. Myrtle Thompson sang. After a buffet lunch, Mr. and Mrs. Irvine left by motor for Seattle. On their return they will take up their residence at 4634 Reid street.

above will be of interest to many of our readers as the bride spent her girlhood days in Redcliff.

## ST AMBROSE DRAMATIC SOCIETY CHOOSES PLAY

At a recent meeting of the executive committee of St. Ambrose Dramatic Society, it was decided that "The Mock Bagger" by Sheila Kaye-Smith and John Hampden would be presented at forthcoming drama festival.

A strong cast was chosen as follows: Reginald Dalrymple, a tramp, Mr. Bert Allison.

Mrs. Reginald Dalrymple, a Trampess. Mrs. F. Kellett. Robert Moore, very much in love, Mr. Bud Taylor.

Meane Auster, also in love, Mrs. L. J. Vernon.

The play will be under the direction of Mr. King.

## ST. AMBROSE CHURCH TO HAVE CHILDREN'S DAY

St. Ambrose Church will observe children's day next Sunday with a special service for children at 10 a.m. All children in the congregation are invited to attend. In the evening there will be a special family evensong to which all fathers and mothers and their families are cordially invited. Other services as usual.

The house and farm buildings of Hop Jones of the Bingville district, were burned to the ground last week end. The origin of the fire is a mystery. There was no insurance.

## Additional Locals

The U. F. A. convention is called to meet in Edmonton the third week in January.

Maskerade Costumes and Wigs for hire. Order early from Mrs. V. Bell, Main St. Redcliff.

Jack Sharky got the decision over Primo Carnera in their 15 round bout last Monday.

Mr. Robt. Slack, who has been visiting his sister, Mrs. Malcolm Stewart for the past month, returned to his home in Regina last week end.

Parliamentary conversations designed to open the way for direct negotiations between Japan and China for a settlement of their controversy over Manchuria resulted in failure.

Friends in Redcliff received word announcing that Dr. Ernest Watts, a former resident of Redcliff and a graduate of our public and high school, was married recently in Edmonton.

Alberta's reported gold strike at Fallen Timber Creek has proven a dud. There was a rush for claims for a week but no gold of any account has yet been found and prospectors are returning to their homes.

A disease of three eye, known as trachoma, has broken out among the Indians on the Stoney reserve at Morley, Alta. and it is stated that half the Indian population may go blind unless the disease is checked.

The Review is informed that Robert Louden, a former resident of Redcliff and a pioneer of this district, died suddenly at Macleod a few days ago. We have not been able to get the particulars.

H. J. Cox had his cricket outfit hit last Monday afternoon and it was surprising the number of old cricket enthusiasts who came around and showed a keen interest in the game. If the interest shown is any criterion there is no doubt that Redcliff will be able to field a good team next season.

Judge Green, of Medicine Hat, was shot at by an unknown assailant, at his home, last Saturday night. The bullet grazed his left side just under the heart. Fortunately the shot was not fatal. Beyond the shock the judge was very little injured. No clue as to the cowardly culprit has yet been unearthed.

How your subscription?

## Red Cross Appeal For More Clothing

May be Left With Mrs. Kitchen or Will Be Called For

At a meeting of the local Red Cross Society held Wednesday afternoon it was decided that no house to house canvass for clothing would be made this year. However the society is greatly in need of such goods at the present time and it is urgently requested that all who have any clothing which could be made use of, will notify officers of the society. Mrs. John Kitchen is convenor of the committee looking after this branch of the work. If any having clothing for this purpose will notify her the goods will be called for, or they may be left with any of the officers.

The society would appreciate a liberal response to this appeal.

## Illustrated Lecture At Gordon Memorial

Scenes From Rockies to be Seen Here on October 27th

Arrangements have been made to have Rev. T. H. Lonsdale, of Banff, give one of his popular illustrated lectures, entitled "Romances of the Rockies," in Gordon Memorial Church here on Tuesday, October 27th, commencing at 8 o'clock p.m.

Mr. Lonsdale has 180 hand colored slides, illustrating the mountains, lakes, rivers, glaciers, animals and flowers of the Canadian Rockies, which should prove interesting as well as educational to young and old.

The slides are very realistic and show Canadian scenery which people from all lands come thousands of miles to see.

Admission: Adults 35c, children 20c at the door.

A union government in this province, similar to that recently in effect in Great Britain, to solve the problems of the recent ly announced deficit and relief difficulties, was proposed at the annual convention of the weekly press association.

## Churches

ST. MARY'S CHURCH Celebration of Mass every Sunday of each month except the first Sunday, at 8:30 a.m.

BAPTIST CHURCH Sunday Services: Sunday School and Bible Class at 11 a.m. Evening Service at 7:30. Thos. Mulligan, Minister.

ST. AMBROSE CHURCH Rev. Malcolm Stewart, vicar 8 a.m. Holy Communion. 10 a.m. Sunday School.

1st and 3rd Sundays: 11 a.m. Choral Eucharist. 2nd, 4th and 5th Sundays: 11 a.m. Mattins and sermon

7:30 p.m. Evensong and sermon

GORDON MEMORIAL UNITED CHURCH

Pastor Rev. R. Erskine Pow 10 a.m. Church School. 11:15 a.m. Morning Worship 3 p.m.—Bowell.

7:30 p.m. Evening Worship. "We need the Light of the Gospel to see Life Steadily and to see it whole."

## Town's Plan For Relief is Ratified

Mayor Wants Resolves Word From Ottawa Yesterday

Mayor Worts went to Edmonton last Monday to consult Premier Brownlee and Mr. McPherson, Minister of Public Works, in connection with the unemployment situation here.

On his return the Mayor expressed himself as well pleased with the interview and the interest shown in his propositions by these officials. The Premier assured the Mayor that his plans would be submitted to Ottawa for approval and that he would communicate with the Mayor as soon as word was received from Ottawa.

Yesterday Mayor Worts received a wire from the Premier informing him that the town's program for unemployment relief had been approved by the Department of Labor, Ottawa and that Mayor would be the Review that the work will be commenced just as soon as possible.

Mayor Worts is deserving of great credit for the successful outcome of his negotiations on behalf of the town and the unemployed.

## 1,300 CANDIDATES IN BRITISH COLUMBIA

Nominations will be received on Friday for Great Britain's general election in 580 constituencies, and it is expected approximately 1,300 candidates will be nominated, against 1,750 in the last general election.

An unusual number of acclamations are expected. Sixty-nine candidates are now in the field without opposition and most of them are supporters of the National Government.

## ROTARY CARNIVAL IS NOW IN FULL SWING

The three big days of fun and frolic that this Rotary club of Redcliff has been putting on this week end is now well under way. On Thursday and Friday evenings of this week fifty dollars will be given away each night.

Every one entering the carnival doors up to 8:15 on these two nights will receive a ticket with a chance to win \$50. The winner must be in the rink at the time of the draw to be entitled to the prize.

All games except the dolls and hams 10c only.

Take a look at the label on your paper and see what it says. If behind please call around.

Mrs. Dumas, who has been residing here for the past six years with her granddaughter, Mrs. E. H. Wallo, left Wednesday for Hamilton, Ont., to join Mr. and Mrs. Wallo who are now located there. Mrs. Dumas who is now in her 89th year, is travelling alone but as she has travelled extensively in both Europe and on this continent, the journey will have no terror for her. Despite her advanced years Mrs. Dumas has a most retentive memory which makes her a most interesting conversationalist and has won her a large circle of friends here. All whom wish her continued health in her new home.

## Canadians prefer the fine Salada quality

**'Fresh from the gardens'**

### The World's Grain Show

"Canada, 1930," a booklet published by the Dominion Bureau of Statistics at Ottawa, summarizes the value of production in Canada for 1929 as follows: Agriculture, 38.1 per cent; forestry, 8; fisheries, 1.2; trapping, 0.4; mining, 0.3; electric power, 2.7; construction, 3.2; custom and repair, 1.9; manufactures, 33.1 per cent.

These figures are significant. They show conclusively the paramount importance of the industry of agriculture.

This importance is accentuated by the fact that the conditions of manufacturing, which occupies second place, reflect almost immediately the conditions of agriculture. It is accentuated even to a greater degree when one comes to examine the manufacturing schedule of the same booklet. Among the twenty-five leading manufacturing industries of Canada, four and eight mill products occupy second place; slaughtering and meat packing third; bread and cheese seventh; bread and bakery products fourteenth.

A glance at the exports schedule discloses the further fact that wheat stands at the top of the list and wheat flour second.

It seems to be needless, therefore, to make an apology for stating that any activity which promises even a surer footing for Canada's greatest industry merits the attention and support of every Canadian.

Will the World's Grain Exhibition and Conference to take place at Regina next year bear scrutiny from this point of view? Let us see.

In the first place, it is an exhibition and a conference and a conference.

Secondly, it is open for participation to all the world.

The exhibition may be conveniently divided into three parts — the competitive, the national and the commercial exhibits.

The competitive exhibits consist of 10 kinds of field crop products, divided into 56 classes, embracing practically all kinds of grain and seed grown in the world. The total cash prize amounts to over \$200,000 and the individual prizes are greater than have been offered before, anywhere in the world, at any other exhibition of this kind.

The winning of these prizes, however, is not the real objective of the exhibition. The stimulus for a better quality of field crops is infinitely more important. It's effect is already apparent. There is ample evidence of this. The demand for registered—better quality—seed is greater all over Canada than it has ever been. One organization reports an increase of almost 100 per cent.

The national and commercial exhibits will take the floor space of the immense new building to the utmost. Twenty-seven acres of ground have been spoken for and more will follow—50 are expected. A visit to these exhibits, occupying a frontage of over a mile and a half, will be an educational feature surpassed only by a trip around the world—a trip, by the way, which most of us are unable to enjoy.

The privilege to participate, either as a competitor in any or all the prize classes, as an exhibitor in the national or the commercial section, or as a mere visitor, is open, wide open to the great wide world.

Conferences will be held and practical agriculturists from many countries will take place during every day of the show.

Then there are the competitions for juniors, the tours of Canada, and a dozen other features, a mere reference to which space will not permit.

This whole program, although not complete at this time, already contains the names of over a score of the "world's best." Surely such a collection of operation of brains as this will constitute an asset to agriculture the world over which no man has the temerity to estimate.

Even from a monetary point of view alone, if the final effect be to raise the value of Canada's agricultural asset of almost 2,000 millions of dollars to the extent of one hundredth of one per cent, annually, the money necessary to carry the project would be an exceedingly profitable business investment.

But the World's Grain Exhibition and Conference will do more than this. It will effectively advance the cause of the rest of the world, who give her an opportunity to take stock and ascertain her standing in field crop production, will stimulate her growers in the use of better seed, will clear away any false impressions in the minds of buyers, will demonstrate to her growers the kind of competition that must be met in the markets of the world, will bring to our own country valuable ideas and experiences, and, most important of all, it will take the minds of the people of the world to have brought the nations of the world into closer communion and a little further along the bumpy and tortuous trail toward the fertile meadows of international peace.

### Scientist Leaving Canada

Professor of Toronto University Will Make Home in England

Professor John Cunningham McLennan, head of the Department of Physics at the University of Toronto, is leaving that institution shortly and will make his home in Surrey, England, according to members of the faculty.

Dr. McLennan is a scientist of international note. His work in connection with helium, which he was the first man to discover and produce in commercial quantities, made him world-famous. During the great war he was scientific adviser to the British admiralty.

### World He Better

A pipeline organ has been invented which turns electricity into music. Many persons would probably be better pleased at the invention of a device to turn some radio music so called. Into useful electricity.

## Suffered Severe, Painful Cramps In Her Stomach

These terrible cramps in the stomach that double you up in pain and make you break out in a cold perspiration, may be stopped by a few doses of Dr. Fowler's Kidney and Bladder Pills.

Mrs. Lloyd Jones, 204 Argyle St., Halifax, N.S., writes: "I have suffered greatly from severe and painful cramps in my stomach. I tried several remedies without result. One day a friend advised me to take Dr. Fowler's Kidney and Bladder Pills. I bought a bottle and got instant relief."

**DE FLOWERS' KIDNEY AND BLADDER PILLS**

### Cut In British Dole

Variety Of Unemployed Men and Women Are Affected

The 10 per cent cut in unemployment insurance benefits in British, commonly called the dole, will affect a variety of unemployed men and women alike, from the age of 16 to 65.

At the same time those in employment are called upon to increase their weekly payments to the "dole fund" and employers' contributions are likewise increased, under the provisions of the national economy bill.

Hitherto youths of 18 have been entitled to \$2.50 a week, rising to \$4.25, according to age. The \$4.25 is the maximum for single men.

Unemployed girls from the age of 21, when the allowance is \$3.75.

Additional benefits for dependent children will not be affected by the reduction.

"After a little wearing, a lovely green velvet—imported dress—lost colour completely. I was disappointed. A friend who had admired it asked me why I wasn't wearing it any more. On being asked the reason she advised trying it and recommending Diamond Dyes. I tried it and lo! the dress that really cost just 13c—the green package of Diamond Dyes.

I have since used Diamond Dyes for both tinting and dyeing. They do either equally well. I am not an expert dyer but I never have a failure with Diamond Dyes. They seem to make the color last. I have dyed my rug and my even. They never stop or fade. I have used them for years. I know the things I dye with Diamond Dyes are redyed."

### Fishermen Are Now Helped By Science

British Has Fitted Up Small Laboratory On Board Trawler

Scientists now use to do a fishing trawler and share the perils and discomforts of the fishermen in their efforts to ensure that the public's diet of fish shall be perfectly fresh.

The British Government's Fisheries Research Station at Aberdeen has equipped the trawler "City of Edinburgh" and fitted up a small laboratory on board. Already, methods whereby the period of freshness in fish can be extended from less than a week to about 10 or 12 days, without a revolution of present methods of storing fish in ice at sea, have been worked out.

The fishing net is being forced to go further and further afield for its catch, and, accordingly, many of the trawlers have to stay away for anything up to a fortnight. These results will be, therefore, of immense benefit to that typically British fish—the haddock, weather-bell of the North Sea fisherman who daily risks his life to provide the land-lubber with his favorite dish of "fish-and-chips" but they are also valuable to all parts of the Empire where a fishing industry exists.

2 cups special cake flour, sifted.

2 eggs, beaten.

1 teaspoon salt.

1 tablespoon shortening.

8 cups milk (about 1 quart).

Shift four once, measure, add baking powder and salt, and mix again.

In shortening. Add milk gradually until soft dough is formed. Knead lightly for 2 to 3 minutes. Roll to 1/4-inch thickness. Cut with 3-inch hole punch.

Put in hot water. Boil 10 minutes. Drain and pat dry. Put in cold water. Boil 10 minutes. Drain and pat dry.

Put in cold water. Boil 10 minutes. Drain and pat dry.

Put in cold water. Boil 10 minutes. Drain and pat dry.

## To Explore Ungava Bay

Scientific Expedition To Visit Little Known Island Near Labrador Coast

In connection with the expedition of the Oxford University Expedition, which sailed from Liverpool recently for St. John's, Newfoundland, where an auxiliary schooner had been chartered to make a journey up the Labrador Coast to Alaskan Island in Ungava Bay, The London Times says:

"Alaskan Island, which is approximately 50 miles in length, has been known since 1610, when Hudson, in passing the island in July of that year, gave it the name of 'Desse Prevoeth', but the earliest recorded landing of a white man is that of Dr. Robert Bell, of the Canadian geological survey, who put ashore there for a few hours in 1887. The island is still uninhabited, though visited from time to time by Eskimos from the mainland in search of walrus."

"The importance of this expedition is in the representation of several sciences in an island survey in a part of the world where exploration concerned hitherto chiefly with the northwest passage and the whaling industry, has been restricted confined to the seaboard and provides little scientific fact with regard to the interior."

"The expedition, which is led by H. M. Clutterbuck, intends to make a scientific investigation of Alaskan Island. The geological work, which Clutterbuck will be continued, and besides this it is hoped, through to survey the biology, botany, geology, and topography of the island."

## For Economic Recovery

Senator Borah Of United States Gives Opinion Of What Is Needed

My view is that there are three, possibly four, major propositions relative to the recovery of Europe, first, a revision of the Versailles treaty, a readjustment of reparations, the recognition of Russia by the United States, and drastic disarmament. I submit at least these are difficult problems. But they are not so impossible by any means as the recovery of Europe without their adjustment. Europe can never recover until the peace treaties and Germany never pay the reparations annexed against her. There will be no disarmament in Europe until the Russian problem is settled. We have been living in a false paradise, a false and disastrous and better times. And ever since the Versailles treaty was signed we have been drifting toward the rapid nation—Senator Borah in New York Radio.

## Increased Trade With Orient

Report Indicates Great Possibilities For Future Expansion There

A comprehensive survey of Canadian trade with Japan and China is contained in a report issued by the Dominion Bureau of Statistics reflecting the unsettled situation in China and also the effects of the financial breakdown of Japan four years ago when 36 banks closed their doors."

The report nevertheless indicates the great potentialities for trade expansion with the Orient, and shows, despite fluctuations due to the foregoing conditions, how Canada's exports to those countries have increased since records began to be kept.

## B.C. Egg Shipment To Britain

A shipment of 5,001 cases of eggs left New Westminster recently for Great Britain as well as an export shipment of butter of 5,516 boxes for the same market.

Apprentice—You want me to clean the office? You said you had a man for your work.

Chief—So we have. He collects the debts.

A gas which stops an aeroplane if it enters the engine in the latest German device in the war against aircraft.

"Very slow, doctor." I've taken it for eighty years.—Ludwig Blatter, Berlin.

W. N. U. 1909

## English Common In Japan and China

Wide Use Impresses Traveller Who Visits the Orient

In a recent issue of the Toronto Globe appeared an editorial which said that "Colonel Lindbergh had reached Asia and leaves the English language behind." But, Jesse A. Lindbergh, well known in Canada, who last year made an extended trip through China and Japan, comments on the statement as follows: "That may be true for a joke, but as a statement of fact nothing could be further from the truth. In Japan, Colonel Lindbergh will find the name of every railway station printed in English as well as Japanese. If he contemplates to board a train he will find the English word 'boy' (Asia's term for a servant) printed on an arm band worn by the porter. Mrs. Lindbergh can go shopping along the beautiful Giza, in Tokyo, and secure her heart's desire by asking in the English language—and so on. With slight modification, the same condition prevails in China. Sixteen hundred miles up the Yangtze Valley I saw English signs advertising foreign boots and shoes. Other articles, I travelled alone from Peiping (China) to Moukden, down through Manchuria, and the whole length of Korea, across the straits by steamer, and practically across Japan. I speak English only, and yet I was not once at a difficult neck of some one, or understand me. Few facts impress a traveller in the East more than this side view of the English language. At Moukden one finds many Russians, some tens of thousands of Japanese, and hundreds of thousands of Chinese. When these three races communicate with each other their one common medium of expression is the English language. No, Colonel Lindbergh does not leave it behind."

## Poultry Field Days

Good Attendance Reported At Demonstrations Held In Saskatchewan

A total of 4,010 persons attended the 46 poultry field days which were conducted throughout Saskatchewan by representatives of the poultry division in the live stock branch of the Department of Agriculture, during June and July. These field days were held for poultry producers and aided by the community organizations who arranged for the location of the demonstrations, most of which were held on farms where successful poultry raising had been practiced. The field men carried with them models and charts and other aids to the problems of poultry production along the most approved lines.

## Reforestation Plans

Temporary Commission May Be Appointed To Alberta

Looking towards the preservation of Alberta forests, the Provincial Government is considering the appointment of a temporary commission to make a complete survey of conservation and reforestation needs, it is announced by Hon. George Hoadley, acting premier. This survey would examine matters of forest preservation, reforestation, protection against soil drifting and the erection of dams in various creeks in the south of the province.

Early rising is a good habit, but it won't get a man anywhere unless he does something after he rises.

## The Oldest Prepared Food

Cheese Heads List With Possibly Butter Kasepied

With the possible exception of butter, cheese is the oldest prepared food in the world. It is made to the French, polkales to the Dutch, breakfast, dinner and supper to the Swiss. In Paris every restaurant worthy of its name has a cheese cellar. The French chef would be as lost without cheese as we would be without eggs—cheese creeps into his delicacies at every turn.

In Alkmaar, Holland, cheese are auctioned off every Friday. On the day before, wagons and boats laden with cannon ball cheese come to town from every direction. The auction begins at ten o'clock sharp. The bidding starts to the strains of Lo-sengrins wedding march played on a wonderful old carillon. At some of these auctions, 125,000 little Edams are sold in a single day.

In all times and all ages foodstuffs have acquired names and pronouns. Some true and others violently erroneous. Cheese enjoys no exception to this rule. Some people pronounce it "rick" and say that only small amounts should be eaten at any time. Other traditions have grown up about the time and way it should be eaten. The most absurd of these warns against the use of cheese at the evening meal because it supposedly causes bad dreams.

There is no need to trust to tradition in this matter, according to nutritionists. Exhaustive studies undertaken by the United States Department of Agriculture have revealed the truth, as anyone who wishes can use cheese to his own best good. Tests reveal that cheese is from 90 per cent. to 99 per cent. digestible.

## To Make Farming Pay

Principles Laid Down By Ontario Agricultural College, Professor

"If the farmer could honestly tell what it cost to raise one bushel of wheat and then he content to take a small profit on that price, doing it on the basis for some time to come, then we could sell every single bushel of his wheat by under selling the other fellow," declared G. T. Christie, Ontario Agricultural College principal, at Calgary.

Addressing the local board of trade, Dr. Christie pointed out that wheat on farm land must be stopped because they were increasing the cost of production. He thought Ontario farmers would shortly bring conditions back to normal by their methods of cutting expenses. He reviewed the policy of leaving high-priced machinery lying idle in fields, rusting and going to waste.

## Safe Week-End Trip

Start from front of house, drive north along road and turn right at first corner; drive straight ahead until end of block is reached; turn right; south to next crossroad street; turning right, pick up traffic light (note signals); follow road north until front of house is reached; turn right into garage driveway. Put-up car. Go right into house. Stay there until Monday morning.

Orange carpets, green pews and gaily painted walls have been introduced into St. John's Church, England, the vicar believing that brightness will attract young people.

## The Cobra Won Out

Dinner For Three Resulted In Digestion For One

What might happen if a small green, succulent frog were placed before three hungry, venomous snakes? Frederick Williams Pittmanson, for 25 years director of the snake park and museum at Port Elizabeth, South Africa, lately found out. His took progressive photographs of the affair and sent them to the London Graphic which published them under the headline, "Dinner For Three: Digestion for One."

First to come at the small green, succulent frog was a four-foot snake (heteropeltis) snake. As the frog began disappearing head first down the snake's narrow gullet, a puffly quick adder moved forward. Seeing the adder, the heteropeltis gulped hard to get its meal down safely; but the quick adder got hold of the frog's right hind leg, started swallowing the prize from the end.

As the two snakes glared into each other's cold, beady eyes, along came snake No. 3, a six-foot Cape cobra which coiled itself nearby and raised its hooded head to inspect the tug-of-war.

Then the cobra put down its head and gilded forward. With a hungry gaze of the fabled lower jaw it seized the frog by the middle and started swallowing it in a third direction.

The snake's head and the cobra, by their undying, held on grimly. Soon, by a series of forward jerks, the cobra showed its jaws over the heads of the other two snakes. Its fangs sank home, its venom flowed, the adder and the heteropeltis went limp and helpless. Then slowly down the cobra's jerking gullet passed frog, snake and all, proving that in the snake world victory is to him whose mouth holds most.

## Sees Great Future

For Fishing Industry

Experienced Fisherman Predicts Good Business For Hudson Bay There is a great future for the fishing industry in Hudson Bay, is the opinion of John Ingbrechton, who, with a crew of eight men, sailed a 30-foot fishing smack over Canadian inland sea this summer.

Four samples of commercial fish taken by net from the waters of the bay have been forwarded to The Post by the experienced fishermen together with a letter telling of his experience. The most prolific species of fish encountered, he wrote, is a pink salmon of fine quality.

## The Younger Generation

American Novelist Has Very Poor Opinion Of Present Day Youth

The younger generation in America is "twenty years old permanently," and its attitude towards the serious problems confronting it in the world today is summed up in the phrase, "Oh, yeah?" is the opinion of Edna Ferber, outstanding American novelist and Pulitzer prize winner.

"I think it would be a good thing if the whole thing would go back to the primeval ooze and start from scratch. I'm certainly haven't made a good thing of it," she said.

## Not Six Or Eight

Out on the farm, where men are men. The women—wives, aunts or nieces. Understand that a male may be kept in hand.

By cutting big pies in four pieces.

## Were Not Always Writers

Varied Business Followed By Authors Before They Attained Literary Success

The business of writing for a living always attracts. It is a business in which little capital outside of mental experience, talent and a large supply of postage stamps are necessary.

"Living Authors," a book of brief biographies, supplies ample encouragement to those prompted by the recent literary successes of a Canadian stage writer and a Chicago novelist.

Shawm Anderson ran a paint factory.

Walter de la Mare was a bookkeeper for 18 years.

Maefield, Britain's poet laureate, worked as a sailor before the mast and as a bartender in a Greenwich village saloon.

Algeron Blackwood once conducted a dried milk business.

Blanchard Lewis was a janitor.

James Joyce managed a motion picture theatre.

Knut Hamsun, winner of the Nobel Prize in Literature with his "Growth of a Soul" once worked as horse car conductor.

W. S. Gilbert was a lawyer without a practice.

Stephen Crane's Remarque was a school teacher, a pedlar, a motor car salesman and organizer in a lunatic asylum before he wrote "All Quiet on the Western Front."

All of which goes to prove the maxim that the best man for the job is the soldier. If one has talent and persistence he or she can turn the literary Pantheon on equal terms with the favoured of men.—Regina Daily Star.

## Money and Marriage

Girls With Money Marry Later Than Those Without

The better off she is, the later a girl marries.

That the age of brides increases with the social and economic status of the families is found by W. W. Notelstein, of the research division of the Millbank Memorial Fund, from a statistical analysis of the marriage ages of 17,876 white women.

Among city girls, he found, the statistics of the professional families married on the average at 24. The daughters of business men tend to go to the altar a year younger, while the daughter of a farmer starts a home of her own at her 22nd year. Girls from the families of skilled, semi-skilled and unskilled workers marry on the average, during the 21st year, but the girl of the first-class tends to postpone the ceremony until she is almost 22.

Country girls marry younger than city girls, but the same curious relationship is found of marriage age with social status. Thus the daughters of farm owners marry at an average age of 23.5, of farm labourers at 20.9, and of farm labourers at 20.1.

American brides, on the average, are older than English ones.

## England Is Still England

Credit Is Founded On Centuries Of Fair Trading

England still is England, and the credit of Britain is the best in the world. It is backed by character, which is the doctor's greatest asset. It is founded on centuries of fair trading and honest business, backed by the stability of British institutions and national life. To the bankers of London, of New York, of the world it does not matter greatly whether the government of the day is Labour, Liberal or Conservative.

What matters is that in any hands the continuity of the British tradition is preserved, and the English habit of paying his debts, meeting his obligations, does not suffer.—Ottawa Journal.

## South African Trade Treaty

Dr. Botha, South African trade representative in London, has been in Ottawa discussing trade relations between the two dominions. A trade treaty is in progress of completion and with good prospects it will be consummated. Canada's exports to South Africa are chiefly manufactures such as automobiles, tractors, rubber goods and agricultural implements and importing from there fruit, hides and manganese ore.

## Getting Out Of It

"Didn't your papa" say "I was a bar"? "It did not." "Didn't it say was a sounder?" "It didn't." "I'm positive some paper said it." "Perhaps it was our competitor in the town," suggested the editor. "Our paper doesn't print stale news."

"He was a fellow as an architect, so he went to the house."

"He driving better houses?"

## Courtesy On The Highways

Drivers In Canada Have Much To Learn From English

An interesting sidelight on the English custom of courtesy on the highways was given by J. Mercer in the London Times. The London News-Tribune, in a recent article at Chatham, Ont., not long ago Mr. Denbigh enjoyed a motor trip through England. The word "enjoyed" is used advisedly, for the Blenheim driver discovered that every other motorist on the highways was exercising the utmost courtesy and pleasure.

In this country speed seems to be the main incentive to enjoyable driving. The idea is to get there quickly. If a motorist catches up to a car which is not going fast enough to suit him, he turns out and shoots past, rarely slowing his horn to give even a faint intimation of his intention. If there is another car coming from the opposite direction, and the action of the speeder causes a tight squeeze, he probably forcing either or both of the automobiles to swerve, dangerously, towards the ditch, it is not unusual for him to him. He speeds to just the same.

In England it is different. Every motorist seems to be considering the comfort of the other fellow. He gives notice of a car coming from the rear, and another approaching from the front, by flashing either or both of the automobiles to swerve, dangerously, towards the ditch, it is not unusual for him to him. He speeds to just the same.

It is like to say that we are progressive and self-reliant, but there are still many things that we can learn from the Method. Courtesy on the highways is one of them.

## New Idea About Death

Biologist Says Process Is Similar To An Explosion

Death is a process similar to an explosion, in that it is accompanied by a release of energy, according to a report in the Quarterly Review of Biology.

The principal chemical compounds of living matter are so unstable, he says, as to be comparable to explosives and they decompose in the same way under relatively slight mechanical stimuli. In experiments he made that the death of yeast cells is accompanied by the production of heat.

Even if an explosive is not set off, the reports, in connection with all unstable substances it is subject to slow decomposition. This he compares to natural death of old age. Only at extreme low temperatures, where all chemical reactions would cease, he says, would this decomposition be prevented and life last for a very long time.

If any vital principle, such as the soul, leaves the body at death, he says, it is because of the results of the "explosions." Its departure must be the result, rather than the cause, of death.

## Understands Coal

When you buy a ton of coal you buy a considerable quantity of synthetic white-of-egg-ton. At least such is indicated by Professor Wilhelm Chung, German scientist, who for the past fifteen years has been riding his hobby—coal. He has made a special study of coal and its derivatives.

If the average person had the same belief in and respect and awe for a Supreme Being during the hours of every day life that they have during the few minutes of a thunder storm, we would be living in a pretty decent world.

The energy which the sun sends toward the earth in its rays has been estimated at 26,000,000 horse power per day.

"First you beg from the lady and then you beg from the lord. At death, my pockets were worn out, and I didn't know where to put the pennies I gave me"—Humand, Hamburg.

"I'm a fellow as an architect, so he went to the house."

"He driving better houses?"

"He driving better houses?"

## CANADIANS GREET KAYE DON WITH GREAT ACCLAIM

Miss England II, who was crowned at the Canadian National Exhibition, was greeted with great acclaim by the Canadians.

These pictures were taken when Kaye Don, famous British speedster driver, reached Toronto after losing the eighty years.—Ludwig Blatter, Berlin.

Very slow, doctor. I've taken it for eighty years.—Ludwig Blatter, Berlin.

A gas which stops an aeroplane if it enters the engine in the latest German device in the war against aircraft.

## THRIFT TOURS

To Europe, with hotels and sight-seeing, back to Montreal—24 days.

Prices are down. You can see London, Paris, Brussels, etc., on an inclusive tour from Montreal—last-seeing, 24 days—and back. Ask for folder on how to travel as amusingly, widely, and well, from \$174—all expenses paid.

For \$129, you can sail from Montreal to Belfast, Glasgow, Liverpool, Plymouth or London and back. See your relatives and friends, or travel at will.

Good going till Oct. 15th Third Class—unique opportunity with jolly companions.

**Sail CUNARD ANCHOR-DONALDSON**

## THE HOUSE OF DREAMS-COME-TRUE

—BY MARGARET FEDLER

"The Splendid Polly," the Herald of Far East.

Hooder & Strouven, Ltd., London.

CHAPTER I.—Continued.

The birth of Jean, two years after their marriage, had been frankly regarded by both of them as an inauspicious omen. It interested them, they were not essentially lovers that to third—not even a third born of Jean's consummation—could be other than superfluous.

They had proceeded to shift the new responsibility with characteristic highbrowedness. A small army of nannies and governesses was engaged, and later, when Jean was old enough, she was despatched to one of the best Continental schools, whilst her parents continued their customary happy-go-lucky existence unimpeded. During the holidays she shared their wanderings, and Egypt and the southern coast of Europe became familiar places to her.

At the age of seventeen, Jean came home to live at Belfrairie, thenceforward regarding her parents with a species of kindly tolerance and amusement. The three of them had lived quite happily together, though Jean had remained always the odd man out; but she accepted the fact with a certain humorous philosophy which robbed it of half its sting.

Then, two years later, Jacqueline had developed rapid consumption, and though Glyn hurried her away to Montevia, in the Swiss Alps, there had been no combating the disease, and the romance of a great love had closed down suddenly into the grey shadows of death.

Peter had been like a man demoralized. For a time he had disappeared, and no one ever knew, either then or later, how he had first faced the grim tragedy which had overtaken him.

Jean had patiently awaited his return to Belfrairie. When at last he came, he told her that it was the most beautiful thing which could have happened—that Jacqueline should have died in the arms of her lover.

"We never knew the downward swing of the pendulum," he explained. "And when we meet again it will be

with me—I don't know in the least where I'm going or where I shall fetch up. That's the charm of it!"—his face kindling. "And it wouldn't be right or proper for me to ding a young woman of your age—and attractions—half over the world with me."

By which Jean, not in the least deceived by his air of conscious rectitude, comprehended that he did not want to be bothered with her. He was bidding for freedom, untrammelled by any petticoats.

"So I've written to my old pal, Lady Anne Brehnan," pursued Peterson, "asking if you may stay with her for a little. You would have a delightful time. She was quite the most charming woman I knew in England."

"That must be rather more than twenty years ago," observed Jean drily. "She may have altered a good deal."

Peterston frowned. He hated to have objections raised to any plan that particularly appealed to him.

"Rubbish! Why should she change? Anne was not the sort of woman to change."

Jean was perfectly aware that her father hadn't the least wish to "discuss" his proposals with her, as he had said. What he really wanted was to tell her about them and for her to approve and endorse them with enthusiasm—which is more or less what a man usually wants when he suggests discussing plans with his woman.

So now, recognizing that he had all his arrangements cut and dried, Jean philosophically accepted the fact and prepared to fall in with them.

"And has Lady Anne signified her readiness to take me in for an indefinite period?" she enquired.

"I haven't had her answer yet. But I have no doubt at all what form it will take. It will be a splendid opportunity for you, altogether. You know, Jean?"—plectically. "You ought really to see the 'stately homes of England.' Why, they're—they're your birthright."

Jean reflected humorously that this point of view had only occurred to him now that he had come to consider so admirably with his own wishes. (Hitherto the "stately homes of England" had been relegated to a quite unimportant position in the background and Jean's attention focussed more directly upon the unpleasant vagaries of the British climate.)

"I should like to go to England," was all she said.

Peterston smiled at her radiantly—the smile of a child who has got its own way with much less difficulty than it had anticipated.

"You shall go," he promised her. "You'll adore St. Peter. It's quite a typical old English manor—lavish and beautiful in its complete, even down to the last detail of a yew hedge."

(To Be Continued.)

## THE RHYMING OPTIMIST

By Aline Michaels

THE POET'S GIFTS

My mother gave me this life that I love  
Through these pulsing veins of mine,  
A part of the tide of the world that flows

In palace and street and shrine,  
My father gave me the power that sees  
The thoughts that men's hearts would hold

And the force that in them abide,  
The love of my mother runs, pure and deep,  
Through the whole of my life, like a song;

And the love of my father still fresh I keep,  
Through the years that he sleeps are long.  
My life seemed happy and bright and sweet

All free, without bonds or bars,  
And I never guessed it was incomplete  
Till a post gave me the stars;

Till a post brought me the salt spray's kiss  
And the sunset's flags unfurled,  
Till a post gave me the key to bliss

In the beauty of all the world.

## TO KEEP THE Children Healthy

When they're "off colour" they're often Dr. Carter's all vegetable food. It's the best for the bowels and liver, they soon bring back smiles and health while the healthy youngsters should show.

## Another Ice Age Coming

Will Start In About 400 Years Is Prediction

In 400 years the world will see the beginning of another ice age according to Fifth Street's new book "This Coming World."

"Down it will come advancing year by year, until it covers all Ireland," he writes. "It will swallow Northern Russia and Siberia, and creep down across Canada. The Orkneys and Shetlands will disappear under vast masses of frozen snow, until at last all Northern Scotland, perhaps as far south as Edinburgh will be blotted out. England, in those days, will be hardly habitable, for the winters will be terribly severe, while the summers, though hot, will be racked by dreadful rainstorms."

Painless and perfect in their action, Miller's Worm Powders are always a safe and reliable remedy for children who show symptoms of worms. These symptoms are easily recognizable in certain restlessness, frequently ending in convulsions. A point of great importance is that after Miller's Worm Powders have expelled the worms, the stomach and bowels are toned up into a very healthy condition.

Brilliant Flight Made  
By Canadian Pilot

Completes Farthest North Commercial Flight in History of Aviation

Flying from Coppermine on the Coronation Gulf to Walker Bay on the northwest coast of Victoria Island and returning between breakfast and supper-time, W. A. Spence, well-known northern pilot, successfully completed the farthest north commercial flight in the history of aviation on September 7, according to word received at Edmonton.

This brilliant flight took Spence over 150 miles further north than the epic flight of Pilot Walter Gilbert with Major L. T. Hurwath in 1930. It covered a total of 600 miles of the most arctic wastes.

Worms in children, if they be not attended to, cause convulsions, and often death. Mother Graver's Worm Powders will protect the children from these distressing afflictions.

Valuable Jewels Found  
Rubies, diamonds, platinum and gold, such as the Queen of Sheba is supposed to have worn when she visited King Solomon, were brought to London by Frank Payler, big game hunter, from mines he believes were the sources of the Queen of Sheba's wealth. Payler found the gems and treasures in a cavern in the west of Aden, Arabia, Abyssinia.

Head Watcher: "Would monster strike Slasher, French, or Italian cooking?"

Customer: "I don't mind—I want a boiled egg!"

An unbroken record for the earth's weather extending back 4,600 years, has been reconstructed by studying clay deposits and tree rings.

## Little Hints For This Week

"See then that ye walk circumspectly."—Ephesians v. 15.

The not for us to trifle! Life is brief. Our age is but a twinkling of an eye. A dropping tear.

We have no time to spare away the hours. All should be earnest in a world like ours.

Not many here, but only one have we, who have heard that that one life ever be?

That narrow span: Day after day filled up with blessed toil. Hour after hour still bringing in new spoil.

—Horatius Bonar.

We have only once to live: therefore let us live to some purpose. The day that dawns this morning will never dawn again. The opportunities which it brought with it will never come again; and if we fail to fill it with the service it requires of us, there will be no possibility of returning to it to repair the mischief. The wheels of Time's chariot have racks to them, and they move only forward.—William M. Taylor.

Doubtless it's true that poverty isn't a crime, but if you're guilty of poverty, you always suffer for it.

## Hill Chalmers Was Wealthy

Sir Hill Chalmers, author, left a personal estate of \$1,000,000. It was disclosed with the filing of his will. This does not include his real estate holdings and the value of his literary property. The estate is divided among his widow, his daughters and sons.

NOW HAS FIVE CHILDREN

WHEN I was first married I had a miscarriage and felt perfectly miserable. I took three bottles of Lydia E. Pinkham's Vegetable Compound and later gave birth to a fine baby boy.

"I now have five children. I always take the Vegetable Compound during pregnancy and it helps me. It benefits my stomach, in-law too." Mrs. W. J. Zintz, R. R. No. 2, Lakeland, Ontario.

Lydia E. Pinkham's VEGETABLE COMPOUND

W. N. U. 1938

**Foods Stay Fresh Longer This Way**

## Interesting

### Local Items

Deut. W. J. Evans left Wed-  
nesday for Edmonton on mili-  
tary business

Sid Worts of Papat. spent the  
Thanksgiving holiday in town  
with his parents.

Mrs. Hicks spent last Sunday  
and Thanksgiving Day in Cal-  
gary visiting her daughter.

An exciting rings tournament  
was played at the Legion club  
last Monday afternoon. R.  
Moore and B. Shaw won the  
prizes.

The Elite Cafe which has been  
under the management of Mrs.  
Johnson for the past few months  
was closed indefinitely last week  
end.

In the world's baseball series  
which finished last Saturday, the  
St. Louis Cardinals won the series  
and the world's champion-  
ship, by defeating Philadelphia  
4 runs to 2. It was the first  
series in five years in which the  
seven games were necessary to  
decide the winners.
